DEPARTMENT OF THE AIR FORCE

HEADQUARTERS AIR FORCE SPACE COMMAND

MEMORANDUM FOR SEE DISTRIBUTION

FEB 24 2005

FROM: AFSPC/CC

150 Vandenberg Street, Suite 1105
Peterson AFB CO 80914-4020

SUBJECT: Commander's Safety Policy Memorandum

1. In fiscal year 2004, 86 Air Force members (including four from Air Force Space Command) lost their lives in accidents. In too many of these cases, people either ignored clear danger signs or failed to think dangerous activities through ahead of time. Driving far into the night after working all day, not wearing a seatbelt and riding a motorcycle recklessly are examples of decisions which take a great toll in Air Force lives. The safety reports which document these tragedies are a sobering reminder that we must all be on our guard, all the time.
2. My guidance regarding safety is simple: I expect all Air Force Space Command personnel to make smart risk decisions, both on- and off-duty. Use the risk management principles you've learned and insist that those around you do the same. I expect commanders and supervisors at all levels to foster a climate of sound safety practices and remind their people to use risk management in all their activities.
3. Whether we perform our mission in-place or deploy to other parts of the globe, we can't afford losses due to accidents. We need everyone on the team safe and ready to perform their part of the mission. Each one of us, from the newest airman to our most senior leader, must make good risk choices--our nation deserves nothing less.

*Let's all work
together to create a
safety culture in
AFSPC!*

LANCE W. LORD
General, USAF
Commander
